More than a century of expertise.

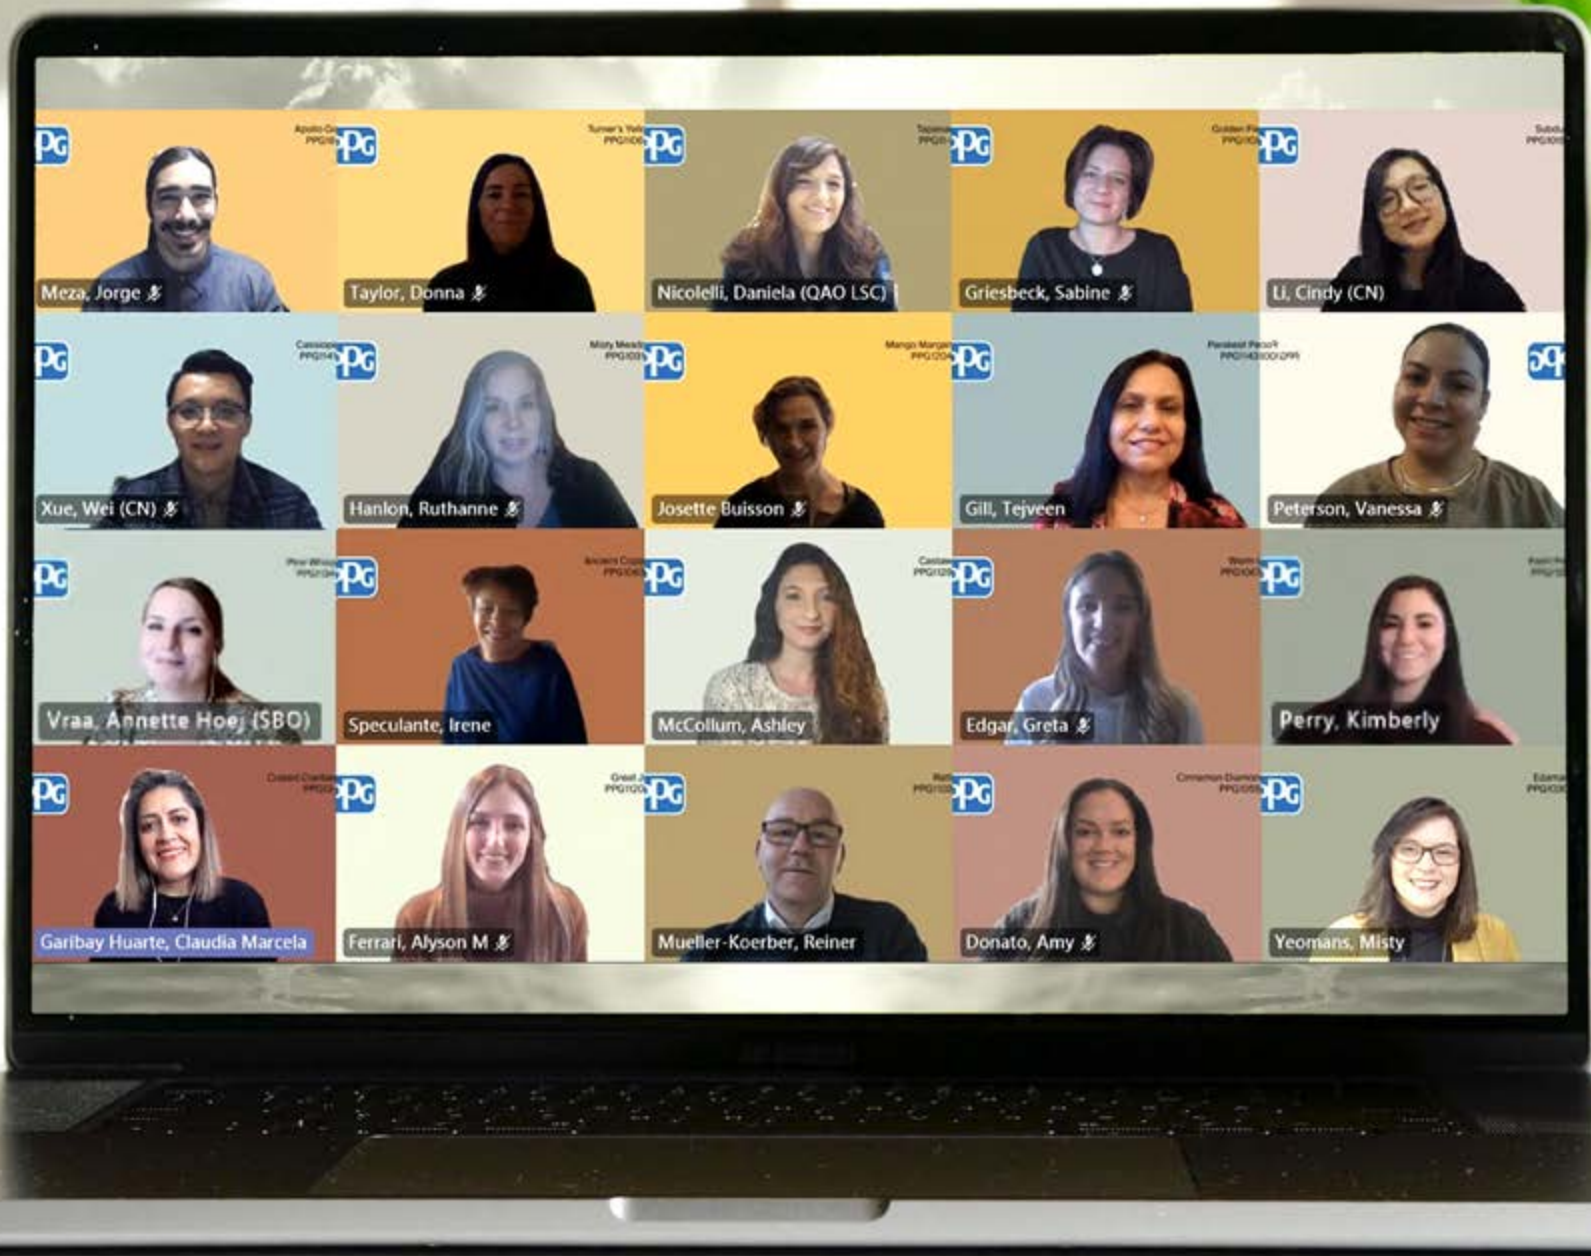

There is a uniqueness to PPG's forecasting expertise in that we use a fact-based approach to identify colour direction for more surfaces than any company in the world. From automotive to architectural; consumer electronics to aerospace; industrial to packaged goods. The benefit is that every industry informs the other.

Our colour stylists analyze exterior and interior commercial and residential colours, styles and textures four years in advance, and produce hospitality market insights for architects and builders to create spaces for luxury, comfort and impact.

Our annual forecasting workshop is the culmination of months of research and customer intel that provides a truly global, validated palette of colour direction. 2021 was a year of firsts, and our annual colour workshop was no exception. Despite hosting a fully virtual event, we preserved and enhanced the integrity and collaborative nature of our exclusive process, despite being miles apart and separated by numerous time zones.

Our colour experts held lively debates, used new digital collaboration tools, curated a cross-cultural trends direction and ultimately, selected the 2022 Colour of the Year.

A Brighter Horizon, with Supportive Colours

OVERARCHING IDEA FOR THE YEAR: HORIZON

We were all experiencing uncertain times, and despite the pandemic, our teams from around the world were converging virtually for the first time to combine our collective research and develop the forecast for 2022.

A single overarching idea became evident - setting the tone for the entire year ahead.

We are at the beginning of something new, looking into the Horizon.

We are holding the Horizon image as a symbol for the state of reflection, hope and reverence in which we find ourselves being while contemplating the possible future.

2022 Colour of the Year

ARCHITECTURAL AUTOMOTIVE AEROSPACE CONSUMER ELECTRONICS

Green, the natural world symbol, is the rising colour in the design market, hands down.

We saw it budding everywhere; whole bathrooms covered in emerald tiles, a cozy sofa dressed in silky green velvet and entire kitchens taking on the nature vibe with sage colour cabinets and walls.

There is, however, one particular shade that kept jumping up at us for its versatile and highly usable disposition; Olive Sprig.

This soft gray-green is soothing, like a fragrant plant, reminiscent of the natural world and it brightens any space with an organic liveliness. It is inside or out, the perfect refresh.

Working almost like a neutral, Olive Sprig is a flexible hue that adapts to most environments, styles and usages.

Remembrance.

There is a comforting amount of certainty we get from traditional architectural styles and classical interpretations of design.

Our desire to ground ourselves in something solid and something established, has been triggered by the recent time spent living in chaos.

We are craving stability, and we remembered what is tried and true to anchor our new reality.

The introspective character is focusing on self-care, relieving anxiety and appreciating life's simple pleasures.

The introspective group – mainly Millennials and Gen X – prioritize stability across all aspects of their lives in reaction to information overload and feelings of chronic uncertainty.

Attitude

Looking for a lifestyle that alleviates stress and soothes anxiety.

The introspectives are looking to reconnect with their feelings, to focus on products, services and initiatives that help people create stronger emotional ties with their inner and outer worlds.

The look is crafted by hand.

Celebrating artisanal and handcrafted aesthetics to give designs a unique and carefully made appeal.

LINES OF COMFORT Shapes will continue to be curvilinear. Texture plays a pivotal role in accentuating the tactile quality of these colors. Pastels and mid-tones call to mind artisans' workshops, where materials are experimented with and pigments explored.

Adventurous.

The inspired group can't be pinned down, either in terms of age range or physicality. This adventurous cohort isn't afraid to stand up for their beliefs, but they do so by spreading joy, not negativity. They want to share and celebrate with their fellow inspired when it comes to consumption, with inclusivity and connectivity high on their list of demands.

ARCHITECTURAL AUTOMOTIVE AEROSPACE CONSUMER ELECTRONICS

Attitude

Optimism.

By far the most varied cohort.

They range from Gen Z to Boomers, but despite the broad demographic, they have many unifiers – the largest being a vivacious appetite to embrace joy and optimism.

Optimism isn't uncool – it's rebellious, and in times of uncertainty it's a brave choice.

THE MAGIC OF THE UNEXPECTED

Playing with scales, exaggerated dimensions and surprising elements, the objects are meant to spark joy and curiosity.

Texture. Patterns. Lines.

Express a personal style using meaningful personal touches such as mood-boosting colours and designs that are arresting or raise a smile.

The choice of material, the application and the non-traditional shapes create ambiguity and visual interest.

HAPPY SELF EXPRESSION

When made to address a cohort that expects joy and celebration, products must be created to meet their lifestyles and their sense of exuberant aesthetic.

ATTITUDE: INNOVATIVE

With innovation as a driving attitude in its creative process, this theme equally embraces what is useful, good for you, and totally weird in the spirit of utmost personal expression.
